Did Salma get a new nose?

Something seems different about Salma Hayek! "It looks like she had the tip and sides of her nose thinned," explains Dr. Anthony Youn, a Michigan plastic surgeon who hasn't treated the 39-year-old and based his comments on these photos. "Thinning a nose automatically shortens it a bit." Salma's rep vehemently denies that the star has had any plastic surgery.

JANET'S LOST 30 POUNDS!
"It's a lot of weight to lose in six weeks," says fitness expert Jim Ryno. "But it's common to drop it quickly at the start." Ryno says a combo of a strict diet (Janet's nixed carbs and fat) and hours of cardio likely did the trick.

Instant wardrobe overhaul!

Don't buy all new clothes for spring! Take last year's looks into 2006 with three key accessories: an oversize tote, a wide belt and wedge platforms. "They'll give new life to everything," says *Today* style editor Lloyd Boston.
