Scarlett's dark side

Actress Scarlett Johansson has traded her glam blond locks for a new brown shade — all for her role in the 2007 film *The Nanny Diaries*. "It's pretty and natural-looking, and it probably works for her role," says Sharon Dorram-Krause, celeb colorist for John Frieda.

TIME FOR A TUNE-UP?

At 52, future *Today* host Meredith Vieira is showing deep grooves and wrinkles, says surgeon Dr. Anthony Youn, who hasn't treated her. She'd benefit from Botox in her forehead and eye region and under her nose (\$500 a pop), as well as laser treatments (\$3,000) to lessen fine wrinkles. At the least, anti-aging cream should be part of her new routine.
